NEW MACHINERY BOOSTS RUBBER PRODUCT OUTPUT;  
MORE ITEMS TO BE PRESSURE CAST

NEW MACHINES SAVE TIME -- Vechernyaya Moskva, 3 Jul 50

A meeting was held at the Moscow Kauchuk Plant by active members of enterprises of the chemical industry in Moscow and Moscow Oblast to discuss methods of achieving greater efficiency. The meeting was sponsored by the Ministry of the Chemical Industry USSR and the Central Committee of the Trade Union of Workers in the Chemical Industry. Measures taken at the Kauchuk Plant include the following:

Spirals used in cementing gasoline and petroleum pipe, formerly made by hand, are now made on a special machine tool. Previously, rubberized materials had not always been cut to the exact proportions required for proper use. This failing has been remedied by the use of a special bias cutting machine.

The shop which makes rubberized fabric for clothing has greatly increased its output.

NEW PRINTING ROLLERS USE LESS INK -- Moskovskaya Pravda, 23 Jul 50

The Moscow Kauchuk Plant, having put out more than 1,000 rubber technical items for various branches of the national economy, is working unceasingly on new products. It has produced a new type of printing-machine roller for the polygraphic industry which requires only half as much printer's ink as previous types.

TO MAKE MORE RUBBER PRODUCTS BY PRESSURE CASTING -- Pravda, 20 Jul 50

The Moscow Kauchuk Plant, which is competing with the Leningrad Rubber Technical Products Plant, plans to expand the number of items produced by pressure casting not less than 20 percent, to increase output per square meter of space 25 percent, and to produce a large quantity of items above the plan through savings in fabric and rubber, by 5 December.

50X1-HUM

Moskovskaya Pravda, 20 Jul 50

The Moscow Kauchuk Plant has produced above its 6-month plan tens of thousands of meters of hose, conveyer belt, and driving belt, and thousands of tons of rubber cast parts.

NEW TIRES HAVE GREATER ENDURANCE -- Moskovskaya Pravda, 23 Jul 50

The Moscow Tire Plant has begun production of new improved tires for Moskvich automobiles. Owners of low-power cars have given favorable reports. The tires have also shown increased endurance on automobiles which have gone through 7,000 kilometers of state testing under difficult road conditions.

MAKES ABOVE PLAN POBEDA TIRES -- Trud, 15 Jul 50

More efficient use of equipment at the Moscow Tire Plant enabled workers to produce enough above-plan rubber for several hundred Pobeda automobile tires during a 10-day period.

TAKE ORDERS FOR RUBBER ITEMS -- Vechernyaya Moskva, 25 Jul 50

The "Kord" Artel is taking orders from all organizations for the production of various industrial rubber products, and for rubberizing metal parts. Orders are also being taken for crude rubber for rolling, and rubber for reworking into rubber composition. Address: Vtoroy Nov. Vladykinskiy Proezd, d. 18-a; telephone D 1-66-24. -- Advertisement
